GET
/books
Parameters
Cancel
Name
Description
includeISBN
boolean
(query)
Include in the results the ISBN numbers. Default=false
--
sortBy
string
(query)
Sort results using the specified parameter. Default=id
--
author
string
(query)
Return only books by the given Author.
author - Return only books by the given
page
integer
(query)
To save resources and bandwidth, larger replies might be broken down into smaller pages with 10 reconds per page. The RFC5988 (Web Linking) standard in HTTP Reply Headers is used for pagination.
The “page” parameter is then used to specify the page number.
page - To save resources and bandwidth
